SabreX[®]

ROOT INOCULANT

for WHEAT AND CEREALS

The formulation for wheat and cereals is easy to use, while delivering impressive and profitable crop responses. Treats all grasses grown for forage and grain. Wheat, Rye, Barley, Sorghum, Oats, Spelt, Triticale.

- Typical yield responses of 5.3 bu/a in wheat
- Contains a patent pending formulation that can induce resistance to stresses such as drought
- Creates bigger root systems and increases tillering
- Proven to increase efficiency in fertilizer and water use
- Two formulations for easy application on your farm or by your commercial seed treater/dealer
- Produces results when used alone or with your seed fungicide program
- Available through your local ag chem or seed dealers

5.3 BU/A

ROI of over \$23/A
(based on \$5/bu wheat price)
